How to join your class on ClassIn

It takes about five minutes. Please do it a day or two before the first class, not just before it starts: signing up needs a code sent to your phone.

You need: a computer or tablet with a camera · a stable internet connection · headphones with a microphone

1. **Download ClassIn**
   On the computer or tablet your child will use: classin.com/download. It's free, for Windows, Mac, iPad and Android. A phone works too, but its screen is small for a class.

2. **Sign up with your mobile number**
   Open ClassIn and press "Sign up". Check that the country code in front of your number is right (for example +44 for the UK). ClassIn texts you a code: type it in, then choose a password. For the nickname, use your child's first name, so I know who's joining.

3. **Open your class link**
   While you're signed in, open the class link from my email. The class then appears in ClassIn.

4. **Tell me you're ready**
   Reply "ready" to my email once you can see the class. Stuck? Send me a screenshot of the screen, and I'll help before the day.

5. **On the day**
   Open ClassIn 5–10 minutes early, find the class and press "Enter" (it opens 10 minutes before the start). A check screen shows your camera and sound: when both work, press "Enter" again. If your device asks to let ClassIn use the camera and microphone, choose Allow.

If something goes wrong

- **The code doesn't arrive:** check the number and the country code, wait a minute and ask for a new code once. Some phone companies block texts from abroad: try another mobile number.
- **Signed in, but no class:** open the class link again while signed in. Still nothing? Tell me the number you signed up with.
- **No picture or sound:** allow ClassIn to use the camera and microphone in your device's privacy settings, and plug in headphones.
- **Still stuck?** Email memi@unshakablemind.com or message me on WhatsApp. I'll help you get in.

Why ClassIn? *It records every class, so your child can watch it again for three months.*
